

Subject Index

Volume 49

- Abstracts, First International Conference on Nutrition and Fitness, 1124
- Acetate, mineral metabolism and (dog), 385
- Acid-base properties, of infant formulas, fat absorption and, 55
- Activity diary, for estimating energy expenditure, 37
- DLW technique estimate vs, 1146
- Age/aging. *See also* Geriatric patient; Pediatric patient
- dietary intake and, relation to work output, physical fitness and body composition, 962
 - energy expenditure and, 968
 - nephropathy and (rat), 1217
- Alanine, metabolism, in muscle, mixed meal and, 1203
- Albumin, serum, highly trained vs untrained women, 1295
- Alcohol consumption, relation to diet, 567
- Alkaline phosphatase, serum, in infants on TPN, 879
- Allergy, soy protein in diet and, 725
- Amino acids. *See also specific amino acids*
- abbreviated designations, 223
 - bioavailability, in liquid concentrate and powder forms of infant formulas (rat), 806
 - intestinal absorption, healthy vs NIDDM subject, 1247
 - ketoanalogues. *See* Ketoanalogues
 - metabolism, in muscle, mixed meal and, 1203
 - plasma levels
 - in diabetics with chronic renal failure, aspartame and, 1302
 - fasting, in elderly men, 559
 - in soy protein, 725
 - urinary excretion patterns, in severe trauma, 814
- Aminoaciduria, of severe trauma, 814
- Amylopectin, dietary, glycemic response to, 337
- Amylose
- cornstarch. *See* Cornstarch, high-amylose
 - dietary, glycemic response to, 337
- Anaerobic threshold, 1077
- Androstenedione, plasma levels, diet and, in postmenopausal women, 433
- Anemia, sickle cell. *See* Sickle cell disease
- Anorexia nervosa, muscle and platelet thermogenesis in, microcalorimetric study, 476
- Anthropometry
- anthropometric indicators and risk of death, 884
 - obesity and body fat distribution in glucose insulin homeostasis, 758
 - postpartum changes in maternal body fat depots, lactating vs nonlactating women, 259
- Antibody response, to capsular polysaccharide of *Streptococcus pneumoniae* type III, vitamin A deficiency and (rat), 501
- Anticonvulsant drugs, biotin transport in human intestine and, 127
- Apolipoproteins, serum, in noninsulin-dependent diabetic, linoleic acid-enriched diet and, 448
- Apoproteins, serum, fructose vs high-amylose cornstarch diet and, 832
- Ascorbic acid
- iron absorption and, 225
 - mononuclear cell content, in elderly people, 511
 - phytate inhibition of iron absorption and, 140
 - selenium interaction with, 862
- Aspartame
- effects on prolactin, cortisol, growth hormone, insulin and glucose, 427
 - plasma amino acid profiles of diabetics with chronic renal failure and, 1302
- Aspartic acid, effects on prolactin, cortisol, growth hormone, insulin, and glucose, 427
- Athenaeus of Naucratis, 921
- Atherosclerosis, genetic factors in, 1025
- Athletics. *See* Nutrition and fitness
- Attention span, in mild zinc-deficiency syndrome, zinc supplementation and, 1266
- Australia, policies and programs in nutrition and physical fitness, 1030
- BAY-M-1099, metabolic effects after sucrose loading (rat), 106
- Bile salts, activation of lipase in milk, 457
- Bioelectrical impedance
- body composition changes, 401
 - measurement of fat-free mass during weight loss, 33
- Biotin, intestinal transport, anticonvulsant drugs and, 127
- Birth defects, vitamin A excess/deficiency and, 358
- Blood glucose
- energy intake and, during Ramadan fasting, 1141
 - postprandial, BAY-M-1099 and (rat), 106
 - preprandial values, glycemic response studies and, 1243
 - response to amylose vs amylopectin starch meal, 337
- Blood urea, energy intake and, during Ramadan fasting, 1141
- Body composition
- in bulimics, 86
 - calorie-restricted low-fat diet and exercise and, 77
 - changes in during weight loss, measurement via bioelectrical impedance and densitometry, 33
 - diet and exercise and
 - age and, 962
 - in yo-yo dieters, 409
 - dual-photon absorptiometry study, 1283
 - energy intake and, in obese individual, 320
 - fat-free mass estimation, 29
 - maternal, postpartum changes, lactating vs nonlactating women, 259
 - muscle mass, fat-free weight and lean body mass estimates via TOBEC, 593
 - overfeeding and, hormonal response in, 608
 - total body electrical conductivity. *See* Electrical conductivity of body, total
- Body density, bioelectrical impedance measurements, 401
- Body fat
- distribution of, glucose insulin homeostasis and, 758
 - maternal, postpartum changes, lactating vs nonlactating women, 259
- Body fatness, diet composition and, 799
- Body mass, lean. *See also* Fat-free mass
- overfeeding and, 608
 - TOBEC estimation of, 593
- Body mass index, plasma and urinary chromium levels and, after glucose challenge, 685

- Body recumbent length, increments at 1 mo intervals, reference data for infant growth, 599
- Body water
loss of, bioelectrical impedance measurements and, 401
total, TOBEC measurements, changes in extracellular fluid volume and (pig), 29
- Body weight. *See also* Weight cycling; Weight loss
fat-free, TOBEC estimation of, 593
increments at 1 mo intervals, reference data for infant growth, 599
maternal, postpartum changes, lactating vs nonlactating women, 259
of parents, in prediction of resting metabolic rate in offspring, 331
- Bogalusa Heart Study, 1320
- Bone mass, peak, 534
- Bone metabolism, ovariectomy and dietary manipulation and (rat), 1184
- Book reviews, Weight Control: A Guide for Counsellors and Their Therapists, A Altschul (ed), 395
- Breakfast, missing. *See* Meal missing
- Breast cancer
alcohol consumption and, 567
in postmenopausal women, diet and plasma androgens in, 433
- Breast-feeding. *See also* Lactation
by women with cystic fibrosis, 612
- Breath tests
hydrogen. *See* Hydrogen breath tests
methane. *See* Methane breath test
- Bulimia
caloric intake in, 86
muscle and platelet thermogenesis in, microcalorimetric study, 476
- Buriti, in hypovitaminosis A, 849
- Burns, severe, nutritional support in, 404
- Caffeine
energy expenditure and, in lean and postobese individuals, 44
thermogenesis and, in lean and postobese individuals, 44
- Calcium
absorption of
coingestion of meal and, 372
from milk
coingestion of a meal and, 372
in lactase-deficient subjects, 377
balance, dietary fructose vs starch and, 1290
bioavailability, calcium supplements and milk, 527
lifetime intake, bone mineral content, bone width, and bone mineral density of radial bone of premenopausal women and, 534
metabolism
effect of short-chain triglycerides on (dog), 385
plasmacytoma in Balb/c mice and, 701
supplementation, effects on acid-base balance and on retention of calcium, magnesium and phosphorus, 527
- Calcium carbonate, calcium absorption from, coingestion of a meal and, 372
- Caloric efficiency, in bulimics, 86
- Calorimetry, indirect
fructose- vs glucose-induced thermogenesis, 667
impact of energy supplementation on energy expenditure in underweight free-living adults, 239
metabolic response to low- and very-low-calorie diets, 745
- Cancer. *See also specific organ*
diet and, 993
- Carbamazepine. *See* Anticonvulsant drugs
- Carbohydrates
complex, oral digestion of, time of chewing vs degree of relaxation in, 97
dietary
endurance fitness and, 1077
ratio to dietary fats, nitrogen retention, substrate utilization and hormone response to, 1169
work performance and, 949
dietary intake
high-fat diet and, 799
recommendations for athletes, 1070
fecal excretion, in premature infants, 1238
malabsorption, fecal pH and, methane excretors vs nonexcretors, 1252
- Cardiovascular disease. *See* Heart disease
- Carnitine
dietary intake, lipid metabolism in infants and, 624
intravenous administration, metabolic effects in HPN patients, 618
supplementation of TPN, in postoperative trauma, 283
- β -Carotene
in buriti, 849
dietary, plasma carotenoid response to, 1258
plasma, vitamin A and vitamin E intake and, 112
serum, pancreatic cancer and, 895
- Carotenoids
absorption of, interindividual variation, 1258
plasma, dietary vegetable carotenoids or purified β -carotene and, 1258
- Casein
bovine milk, iron absorption in humans and, 546
in human milk, separation and analysis, 464
in infant formula, amino acid bioavailability and, 806
- Catecholamines, very-low-calorie diet and, 745
- CCM (calcium, citric, malic acid combination), calcium absorption from, coingestion of a meal and, 372
- Cereals, iron-fortified, for infants, 1274
- Ceruloplasmin, serum, in infants on TPN, 879
- Children. *See* Pediatric patient
- China, policies and programs in nutrition and physical fitness, 1060
- Chocolate milk, lactose intolerance and, 840
- Cholecystokinin (CCK), plasma, response to medium-chain fatty acid meal, in chronic pancreatitis, 247
- Cholesterol
absorption, cholesterol synthesis and elimination and, 629
elimination, absorbed dietary cholesterol and, 629
fasting, amylose vs amylopectin meal and, 337
high-density lipoprotein, amylose vs amylopectin meal and, 337
serum
fructose vs high-amylose cornstarch diet and, 832
lecithin intake and, 266
in noninsulin-dependent diabetic, linoleic-acid-enriched diet and, 448
ultraendurance cycling and, 980
within-population variations, cholesterol absorption and, 629
soy foods and, 725
synthesis, absorbed dietary cholesterol and, 629
- Cholesteryl esters, serum, linoleic acid content, fatty acid composition of diet and, 269
- Chromatography, fast protein liquid (FPLC)
anion exchange, whey proteins in human milk, 464
gel filtration, whey proteins in human milk, 464
- Chromium
metabolism, total parenteral nutrition and, 573
plasma level, glucose challenge and, in lean and obese diabetics, 685
urinary excretion, glucose challenge and, in lean and obese diabetics, 685
- Chromium oxide, in fecal specimens, oxidation via sodium peroxide fusion, 901
- Chylomicron, clearance
assessment of, 306
in athletes vs sedentary men, 443
- Cocoa, lactose intolerance and, 840
- Cognitive function, in school children of differing nutritional status, effect of missing breakfast on, 646
- Colon cancer, physical activity and, 999
- Colon disease, methane breath excretion in, 1252
- Commentary, thoughts on training and employment opportunities in clinical nutrition, 180
- Computerized tomography (CT scan), obesity and body fat distribution in glucose insulin homeostasis, 758
- Conjunctival impression cytology, in subclinical vitamin A deficiency, 490
comparison with biochemical assessments, 495
sensitivity and specificity of, 495

- Constipation, fermented milk consumption and, 675
- Contraceptives, oral, hepatic vitamin A stores and, 845
- Copper
- absorption, stable isotope study, 870
 - balance
 - dietary fructose vs starch and, 1290
 - in infants on TPN, 879
 - stable isotope study, 870
 - dietary requirement, 870
 - in human milk, during lactation, 773
 - metabolism, total parenteral nutrition and, 573
 - retention, stable isotope study, 870
 - status
 - in US Navy SEAL trainees, 695
 - zinc or zinc-iron supplementation and, 145
- Cornstarch, high-amylose, dietary, metabolic risk factors associated with heart disease and, 832
- Coronary heart disease. *See* Heart disease
- Cortisol
- plasma, dietary lipids and, 752
 - secretion, effects of aspartame and its constituent amino acids, 427
- C peptide, serum, glucose-stimulated, obesity and body fat distribution and, 758
- Creatinine
- ratio to urinary 3-methylhistidine, in infection, 62
 - urinary excretion, muscle mass estimate, TOBEC vs, 593
- Cystic fibrosis, breast milk composition of women with, 612
- Death, risk of, in children, anthropometric indicators and, 884
- Dehydroascorbic acid, mononuclear cell content, in elderly people, 511
- Dehydroepiandrosterone sulfate (DHEAS), plasma levels
- diet and, in postmenopausal women, 433
 - dietary lipids and, 752
- The Deipnosophistae*, 921
- Densitometry, measurement of fat-free mass during weight loss, 33
- Dental caries, nutritional status and, 417
- Depression, physical activity and, 999
- Deuterium. *See* Doubly labeled water (DLW) technique
- Diabetes mellitus
- chronic renal failure in, aspartame and plasma amino acid profiles in, 1302
 - insulin-dependent, glycemic response of food in, 658
 - metabolic fuel regulation during exercise and, 938
 - noninsulin-dependent
 - diet and, 993
 - guar gum in, metabolic and nutritional effects, 345
 - incidence of, dietary habits and, 708
 - intestinal glucose and amino acid absorption in, 1247
 - linoleic-acid-enriched diet in, effects on serum lipoprotein and apolipoprotein and insulin sensitivity, 448
 - plasma and urinary chromium levels in, glucose challenge and, 685
 - postprandial glucose levels after sucrose loading (rat), BAY-M-1099 and, 106
- Diaphragm, strength and endurance, starvation and (rat), 738
- Diarrhea, xylitol-induced, 1228
- Dicarboxylic acids, medium-chain, urinary excretion, in infants, dietary carnitine and, 624
- Diet
- alcohol consumption and, population study, 567
 - American, fiber content, 352
 - in ancient Greece and Rome, 921
 - ascorbic acid intake, vitamin C status in elderly and, 511
 - assessment, relationship to cardiovascular risk factors, 1320
 - bone metabolism and, in ovariectomized rat, 1184
 - of bulimic patients, caloric content, 86
 - changing patterns in Greek population, 1042
 - chronic disease and, German Democratic Republic, general population vs elite athletes, 1007
 - in community control of cardiovascular disease, 1017
 - endurance fitness and, 1077
 - energy expenditure and. *See also* Nutrition and fitness, diet and energy expenditure
 - fat composition, energy intake and, 799
 - fat-controlled, adherence to, linoleic acid composition of serum cholesteryl esters and erythrocyte membranes and, 269
 - fructose vs high-amylose cornstarch, metabolic risk factors associated with heart disease and, 832
 - high-fat
 - energy intake and, 799
 - hormones regulating lipid and carbohydrate metabolism and, during menstrual cycle, 752
 - high-fiber, 352
 - hypocaloric, medium-chain triglyceride substitution in, metabolic effects, 326
 - lecithin intake, serum cholesterol and, 266
 - linoleic-acid-enriched, in noninsulin-dependent diabetic, effect on serum lipoproteins and insulin sensitivity, 448
 - low-fat
 - hormones regulating lipid and carbohydrate metabolism and, during menstrual cycle, 752
 - weight loss and, 77
 - low-fat, high-fiber, serum estrone sulfate levels and, 1179
 - menhaden oil, survival after exposure to endotoxic shock and (guinea pig), 277
 - nephropathy and (rat), 1217
 - nonvegetarian, postmenopausal woman, plasma androgens and, 433
 - plasma androgens and sex-hormone-binding globulin in postmenopausal vegetarian and omnivorous women and in breast cancer patients and, 433
 - plasma carotenoids and, 1258
 - protein-sparing modified fast, resting metabolic rate after, 93
 - during Ramadan fasting, blood glucose and urea and, 1141
 - selenium-restricted, selenium metabolism and, 854
 - smokeless tobacco use and, 482
 - unbalanced, chronic disease and, 993
 - vegetarian, postmenopausal woman, plasma androgens and, 433
 - very low calorie, metabolic response to, 745
 - weight-loss regimen, exercise as supplement to, 1110
 - work performance and, 949
- Dietary habits, incidence of NIDDM and, 708
- Dietary recommendations, *Surgeon General's Report on Nutrition and Health* and, 23
- Dietary survey, food consumption patterns in 1960s in seven countries, 889
- Dieting, yo-yo. *See also* Weight cycling
- effects on weight reduction, resting metabolic rate, and lipolytic activity before and after exercise and/or diet treatment, 409
- 1,25-Dihydroxycholecalciferol, bone metabolism and (rat), 1184
- Disaccharidase activity, in starved rat, dietary whey proteins and, 71
- Disease, chronic
- age-related, 1090
 - European patterns, 985
 - in Greek population, age-adjusted mortality rates, 1042
 - obesity and, in North American Indians, 786
 - physical activity and, 999
 - physical activity and diet and, German Democratic Republic, general population vs elite athletes, 1007
 - in Third World, 985
 - unbalanced diets and, 993
- DLW. *See* Doubly labeled water (DLW) technique
- Doubly labeled water (DLW) technique
- energy expenditure estimate, comparison with estimates via energy intake, heart rate and activity diary, 1146
 - impact of energy supplementation on energy expenditure in underweight free-living adults, 239
- Dual photon absorptiometry (DPA), body composition assessment, 1283
- Duodenum
- fat emulsion infusion, in assessment of chylomicron-triglyceride clearance, 306
 - lactose digestion in, in lactase deficiency, yogurt ingestion and, 828
 - mucosal lactase activity, in lactase deficiency, ingestion of yogurt/pasteurized yogurt and, 823
- Dysbetalipoproteinemia, α -tocopherol and γ -tocopherol in, 517

- Eating. *See* Food intake
- Eating disorders. *See* Anorexia nervosa; Bulimia
- Education
- biennial survey of physician clinical nutrition training programs (1988), addendum, 191
 - creation of regional medical-nutrition education network, 1
 - training and employment opportunities in clinical nutrition, 180
- Eicosapentaenoic acid (EPA), 277, 290
- Electrical conductivity of body, total (TOBEC)
- fat-free mass estimates from, changes in extracellular fluid volume and (pig), 29
 - relation to estimates of muscle mass, fat-free weight and lean body mass, 593
- Endothelial cell, injury, free fatty acids and, 301
- Endotoxin, exposure to, survival after, menhaden oil diet and (guinea pig), 277
- Endurance capacity, 1077
- diet and, 1077
- Endurance performance, 1077
- diet and, 1077
- Energy balance
- during exercise, regulation of, gender differences in, 958
 - ultramarathon running and, 976
- Energy cost, of pregnancy, 765
- Energy expenditure. *See also* Energy balance
- caffeine consumption and, in lean and postobese individuals, 44
 - daily, genetics, age and physical fitness and, 968
 - diet and. *See* Nutrition and fitness, diet and energy expenditure
 - estimation of
 - accuracy of heart rate monitoring and activity diaries, 37
 - doubly labeled water (DLW) technique, comparison with energy intake, heart rate and activity diary estimates, 1146
 - fructose- vs glucose-induced thermogenesis, 667
 - metabolic (MEE), in severe burn trauma, prediction of calorie requirements in, 404
 - in underweight free-living adults, impact of energy supplementation on, 239
- Energy intake
- balance method for estimating energy expenditure, DLW technique estimate vs, 1146
 - dietary fat content and fat oxidation and, 799
 - exercise and, 1099
 - during menstrual cycle, 252
 - in obese individuals, reporting accuracy, 320
 - during Ramadan fasting, blood urea and glucose and, 1141
- Energy metabolism
- dietary carbohydrate:fat ratio and, 1169
 - in yo-yo dieters, 409
- Energy requirements
- lactating women, 259
 - for maintenance of body weight, correlation with adiposity vs lean mass, 320
- Energy stores, exercise and, 1099
- Energy supplementation, impact on energy expenditure in underweight free-living adults, 239
- Epidemiology
- eating patterns and relationship to cardiovascular risk factors, 1320
 - nutritional status, tooth eruption, and dental caries, 417
 - obesity in North American Indians, 786
 - relationship of alcohol consumption to diet, 567
- Erythrocytes
- glutathione peroxidase deficiency, home parenteral nutrition and, 132
 - membranes, linoleic acid content, fatty acid composition of diet and, 269
 - superoxide dismutase, zinc supplementation and, 145
 - zinc content, in highly trained vs untrained women, 1295
- Estrogens, serum, low-fat diet and, in premenopausal woman, 1179
- Estrone sulfate, serum, low-fat diet and, in premenopausal woman, 1179
- Euglycemic clamp, 326
- fructose-induced insulin resistance (rat), 1155
- Eurofit test, 1048
- Europe
- assessment of youth fitness, 1048
 - nutrition policies, 985
- Exercise. *See also* Nutrition and fitness
- adaptation in energy intake to high-fat diet and, 799

of meal, gastric function and, 51
- Testosterone
overfeeding and, 608
plasma levels, diet and, in postmenopausal women, 433
- Thermic effect of food, 667
- Thermogenesis
caffeine consumption and, in lean and postobese individuals, 44
diet-induced, 667
exercise and, 1099
in muscle and platelets, in anorexia nervosa and bulimia, microcalorimetric study, 476
- Thromboxane, taurine and, 1211
- Thyroid, very-low-calorie diet and, 745
- T lymphocytes, α -linolenic acid and long-chain ω -3 fatty acid supplementation and, 290
- Tobacco, smokeless, gustatory function and dietary habits of users of, 482
- TOBEC. *See* Electrical conductivity of body, total
- α -Tocopherol, vitamin A and vitamin E intake and, 112
- Tocopherols. *See also* Vitamin E
preferential incorporation of α -tocopherol vs γ -tocopherol in human lipoproteins, 517
- Tomography, computerized. *See* Computerized tomography
- TPN. *See* Parenteral nutrition, total
- Trace elements, metabolism, total parenteral nutrition and, 573
- Transit time
mouth-to-cecum, fiber-supplemented enteral feedings and, 471
rate of, xylitol vs glucose ingestion and, 1228
- Transit time studies, chromium oxide-containing fecal samples, oxidation via sodium peroxide fusion, 901
- Trauma
burns. *See* Burns
severe, aminoaciduria of, 814
- Triacetin, mineral metabolism and (dog), 385
- Triglycerides
clearance, assessment methods, 306
fasting, amylose vs amylopectin meal and, 337
- medium-chain, in hypocaloric feeding in obese women, metabolic effects, 326
- plasma, dietary fructose and glucose and (rat), 1155
- serum
fructose vs high-amylose cornstarch diet and, 832
postprandial, exercise and, 443
short-term TPN and, 794
ultraendurance cycling and, 980
- short-chain, mineral metabolism and (dog), 385
- Trypsin inhibitor, in soy products, 725
- Tumorigenesis, fermented milk consumption and, 675
- United States
macronutrient intake of athletes vs general population, 1070
policies and programs in nutrition and physical fitness, 1039
- Uric acid, serum, fructose vs high-amylose cornstarch diet and, 832
- Urine
amino acid excretion patterns, in severe trauma, 814
zinc excretion, in highly trained vs untrained women, 1295
- Vegetable carotenoids, plasma carotenoid response to, 1258
- Vegetarian
high-phytate diet, iron absorption and, 542
postmenopausal woman, plasma androgens in, 433
- Venezuela, policies and programs in nutrition and physical fitness, 1057
- Viable starter culture, in lactase deficiency, yogurt ingestion and, 828
- Vitamin A
depletion and repletion, immune response to capsular polysaccharide of *Streptococcus pneumoniae* type III and (rat), 501
food source of, in Brazil, 849
in liver, oral contraceptive use and, 845
safety of, 358
serum, pancreatic cancer and, 895
status
estimation, isotope dilution assay, 713
oral contraceptive use and, 845
supplementation, fasting plasma retinyl esters and, 112
total body reserves, estimation via isotope dilution assay, 713
toxicity, 358
- Vitamin A deficiency, 358
immune response and (rat), 501
subclinical, conjunctival impression cytology for detection of, 490
comparison with biochemical assessments, 495
xerophthalmia and, buriti in, 849
- Vitamin B-6, dietary, protein utilization and, 636
- Vitamin C, status, in elderly people, ascorbic acid intake and ascorbate and dehydroascorbate distribution in mononuclear cells, 511
- Vitamin E
serum, pancreatic cancer and, 895
supplementation
in low-birthweight infants, 121
preferential incorporation of α -tocopherol vs γ -tocopherol in human lipoproteins, 517
vitamin A status and, 112
- Vitamins
fat-soluble, in noninsulin-dependent diabetes, guar gum and, 345
generic descriptors and trivial names, 215
- Waist-to-hip ratio, obesity and body fat distribution in glucose insulin homeostasis, 758
- Wasting, in school children, effect of missing breakfast on cognitive functions, 646
- Weight. *See also* Body weight
- Weight cycling
exercise in, physiological aspects, 1099
experience of human dieters, 1105
- Weight loss. *See also* Weight cycling
calorie-restricted low-fat diet and exercise and, 77
changes in fat-free mass during, measurement of, 33
maintenance, exercise in, 1115

massive, sustained depression of resting metabolic rate after, 93
 weight regain after, repetitive. *See* Dieting, yo-yo
 Weight regain, after weight loss. *See* Dieting, yo-yo
 Wheat, lipid digestion and absorption (rat), 1192
 Wheat bran, extrusion cooking of, iron and zinc retention and, 151
 Whey proteins
 bovine milk, iron absorption in humans and, 546
 dietary, jejunal mucosal morphology and, in starved rats, 71
 in human milk, separation and analysis, 464
 in infant formula, amino acid bioavailability and, 806
 Work capacity, 1077
 Work performance, nutritional effects, 949
 World Health Organization (WHO), policies and programs in nutrition
 and physical fitness, 1063
 Xerophthalmia, 490
 buri for, 849
 Xylitol, rate of gastric emptying and motilin, insulin and GIP release
 and, 1228
 Yogurt
 in lactase deficiency
 lactose absorption and mucosal lactase activity and, 823
 viable starter culture, β -galactosidase activity and lactose in duode-
 num after ingestion, 828
 in lactose maldigestion, 1233

pasteurized, in lactase deficiency, lactose absorption and mucosal
 lactase activity and, 823
 prophylactic and therapeutic aspects, 675

Zinc

balance
 dietary fructose vs starch and, 1290
 in infants on TPN, 879
 bioavailability, from soy foods, 725
 deficiency, in children, 1266
 dietary, bone metabolism and, in ovariectomized rat, 1184
 in human milk, during lactation, 773
 metabolism
 plasmacytoma in Balb/c mice and, 701
 total parenteral nutrition and, 573
 retention of, from extrusion-cooked wheat bran, 151
 serum, fiber-containing enteral feedings and, 471
 status
 endurance training and, 1295
 in US Navy SEAL trainees, 695
 zinc or zinc-iron supplementation and, 145
 supplementation
 in growth-limiting, mild zinc-deficiency syndrome, 1266
 iron, copper and zinc status and, 145
 Zinc tolerance test, in highly trained vs untrained women, 1295
